

## SIRENE Help sheet

Object	Users concerned
Bulk update modification	SGT services

### 1. Description

In bulk update modification, we mean modify information on a set of sites. It is so possible to change the company associated to some sites by another one or change RSM associated to sites by another RSM (case of RSM substitution on a region)

### 2. How to access ?

Go to 'Definition' menu and click on 'Bulk Modification'.

### 3. How to bulk update (RSM or Company) ?

When you access figure 1, you must identify sites on which you want to make RSM or company modification. To do that, choose some criteria in the frame called 'Filter box'. Then execute the search with an action on 'Search' button. Now, you have to check boxes (on the left of result screen) the sites on which you want to apply modification. You could check its one by one or all ones with the 'Select / Unselect All' button. Eventually, you must identify in the frame called 'New value to attribute' the information you want to modify on the selected sites (RSM or company) and its new value. A 'Update' button will appear. Click on it to make the bulk update modification.

**SIRENE**  
(Release v1.00 - Optimized for Internet Explorer 6) 6128 sites
